or upgrade to our ultimate tailor made freeform multifocal for an extra **\$50**

Amazing frame ranges, Amazing lens choices, Amazing prices!

conventional multifocals

freeform

Freeform, tailor made multifocal lenses have significantly wider fields of vision in the reading and intermediate zones and slightly wider fields of vision in the distance zone.# This reduces the need for head rotation, reduces neck strain and reduces peripheral distortion improving vision.

*Subject to full annual Optical entitlement being available and claiming through HICAPS. Excludes HBF. Lenses are 1.5 index freeform lenses with a hardcoat and may not suit all prescriptions. See in store for further details. Conditions apply. Offer valid to 30/4/12.

#Photographs are illustrative and different styles of freeform lenses have different fields of vision. Discuss your needs with one of our qualified Optical Dispensers to decide which style best suits your needs.
